

FINALLY, A TOOL THAT TAKES VERTICAL TILLAGE TO THE NEXT LEVEL.

The Rogue VT[®] manages crop residue, improves water infiltration, aerates soil, and decreases erosion.

Walking tandem wheels with high-quality tires

Double rolling baskets that follow each other

Tines fracture soil up to 8" below the surface

Two-year breakage warranty, INCLUDING the tines

Adjustable harrows & coulters blades

Frame flexes 15° down and infinitely upward

Gang angles and coulters depth settings adjustable without a wrench

Shorter rollers keep dirt away from critical parts

Working Widths
16½' - 24' - 31½' - 39'

Frame Flex
15° down

Blade Diameter
22"

Blade Spacing
8"

The American-made Rogue VT® manages crop residue, improves water infiltration, aerates soil, and decreases erosion—all key factors in optimizing soil health and getting the most out of your crops.

WHY CHOOSE THE ROGUE?

- 1. Adjustable coulters and harrows.** The Rogue comes equipped with adjustable coulters and harrows that size residue and smooth the seedbed.
- 2. Deep soil fracturing.** The Rogue perfectly conditions soil by fracturing it up to 8 inches below the surface. This deep fracturing breaks up soil compaction and allows the next crop to easily absorb moisture and nutrients.
- 3. Strong, flexible frame.** The Rogue's frame flexes an impressive 15° down and infinitely upward, allowing it to handle heavy residue and tough tillage conditions.
- 4. Erosion control.** The Rogue sizes residue and pins it to the ground with harrows, keeping it in the field. Most residue is left near the soil surface, providing crucial erosion control.
- 5. Soil aeration.** The Rogue can also be used to aerate pastures and hay ground.

The Rogue is designed by
the tillage experts at **SOIL**
Service, Inc.
